

include/shad/core/type\_traits.h

```
graph TD; A[include/shad/core/type_traits.h] --> B[functional]; A --> C[type_traits]
```

The diagram illustrates a header file dependency. A central box at the top, labeled 'include/shad/core/type\_traits.h', has two blue arrows pointing downwards to two separate boxes below it. The left box is labeled 'functional' and the right box is labeled 'type\_traits'. This indicates that the 'type\_traits.h' header file includes both 'functional' and 'type\_traits' headers.
